

KEEP AN EYE ON ALL THE COSMETIC NEWS WITH DR HOLLY

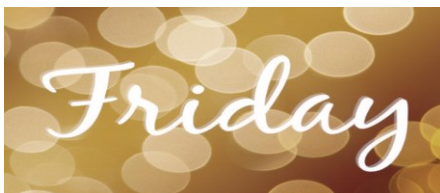

Dr Holly - February News

Hi everyone! Welcome to my first newsletter of 2017 & happy new year to you all!

It's already been a busy start to 2017 and there are so many great new developments I'm going to introduce to the Dr Holly clinic over the next couple of months, with the aim to make everyone feel refreshed and more rejuvenated!

Extended Hours

I'm excited to announce that the Dr Holly clinic will now be open Fridays from 1pm-6pm as well as Saturdays 9am-5pm. You can book either by messaging me through my Facebook page (www.facebook.com/drhollycosmetic), or call/text (0401577827) or email dr-holly@outlook.com

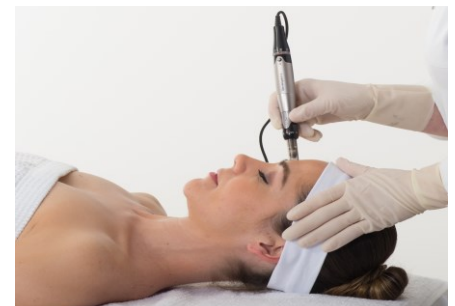

Introducing the Medical Dermapen

Dermapen is a fantastic treatment option to help improve signs of ageing and UV damage, hyperpigmentation, enlarged pores, scarring and Rosacea. Dermapen is a form of skin needling whereby tiny oscillating vertical needles are used to create pinholes in the skin.

Needling (or collagen induction) is a relatively new procedure here in Australia, however the origins of skin needling date back 1000's of years in China. There are other skin needling devices out there but the Dermapen is unique as it has 12 tiny spring- loaded needles on one cartridge which oscillates at 108 prickles per second.....that's 1296 in total per second.

Other traditional brands (skin/dermal rollers) do not compare with the number of oscillations, but also they have angulated needles on a roller; causing unnecessary trauma to the healthy overlying skin.

Dermapen is also superior to laser treatments as there is no risk of burning the skin!

A model receiving a Dermapen treatment

Skin becomes firmer smoother and cleaner since new collagen and elastin are produced. The Dermapen can work at various depths to treat different issues with the skin. Only a qualified Medical Practitioner can carry out treatments with the Dermapen when treating at deeper depths e.g. those used to treat acne scarring. Usual treatment regimens are one treatment every 4-6 weeks for a total of 4-6 treatments.

I've been treating one lady in the clinic for her facial acne scars; after only 2 treatments she informed me last week she can already see a huge difference in her scar appearance & she exercised for the first time the other day without any foundation on.....

she still needs another 2 treatments but I'm already impressed with her feedback! This particular patient will be featuring on my subsequent newsletters so you can follow her progress.

Don't forget other areas of the body.....Dermapen is suitable for abdominal or surgical scars & stretch marks too!!

Before and after Dermapen facial rejuvenation

Dr Holly & Lisa attended the formal training in December 2016 and have been testing it out on themselves and various volunteers since!

The back of my hand was 'Dermapened' and it felt like a baby's bottom afterwards!

Treatment packages available.....
Message Dr Holly for more information or keep an eye on my FB page for more updates.

Coming Soon - Medical Grade Facial Peels!

I'm just awaiting my brand new stock of medical grade facial peels: they will vary from mild peels (superficial to the skin) where no time off work is required, to deep chemical peels where it takes a week for full recovery.

They are used to treat sun damaged skin and fine lines, freckles and tired/dull skin.

More information in the next newsletter!

Valentine's Day is around the corner!

Don't forget Valentine's Day is just around the corner: buy your loved one a Dr Holly gift voucher to use on any treatment in the clinic!

Sssssssshhhhhh....

Another exciting announcement: Dr Holly has been specially invited to the Australian Launch of one of Allergan's new products. It has been widely used in the USA over recent years with some amazing results.

The molecule is Deoxycholic acid & it's a fat dissolving injection for under the chin/neck to get rid of those stubborn turkey necks!!

It's really exciting as there have only been a select few invited to the launch and therefore there will only be a very small number of clinicians offering the treatment across Australia.....Dr Holly will be one of them! For more information in the next newsletter!!
